

# Mindreading & Joint Action

## **2. What are mental states?**

A person is standing on a beach at sunset, looking out at the ocean. The sun is low on the horizon, casting a bright orange glow across the sky and reflecting on the water. The person is silhouetted against the bright light. In the background, there are dark mountains or hills. The overall scene is peaceful and contemplative.

'(4) For any p: One ought to believe that p only if p.

'the holding of this norm is one of the defining features of the notion of belief [...] That [...] is what makes it the state that it is.'

(Boghossian 2003:37,38-9)

'(4) For any p: One ought to believe that p only if p.

'the holding of this norm is one of the defining features of the notion of belief [...] That [...] is what makes it the state that it is.'

(Boghossian 2003: 37, 38-9)

'Aside from our purposes in forming beliefs or in using beliefs as guides to action, there is nothing they should or shouldn't be. ... The only fault with fallacious reasoning, the only thing wrong or bad about mistaken judgements, is that, generally speaking, we don't like them. We do our best to avoid them. They do not—most of the time at least—serve our purposes'

(Dretske 2000: 247-8)

'Rational intentions should be agglomerative. If at one and the same time I rationally intend to A and rationally intend to B then it should be both possible and rational for me, at the same time, to intend to A and B.'

(Bratman 1999:220)

‘chimpanzees understand ... intentions ...  
perception and knowledge ... Moreover, they  
understand how these psychological states  
work together to produce intentional action’  
(Call & Tomasello 2008:191)

‘from 7 months on ... humans automatically  
compute other’s beliefs and seem to hold  
them in mind as alternative representations of  
the environment.’

(Kovács et al 2010: 1834)

Merely purposive agent

Creature construction

Self-knowing, truth-seeking ...

'Suppose that A and B are [outcomes] between which the agent is not indifferent, and that N is an ethically neutral condition [i.e. the agent is indifferent between N and not N]. Then N has probability 1/2 if and only if the agent is indifferent between the following two gambles.

B if N, A if not  
A if N, B if not'

(Jeffrey 1983:47)

‘modern philosophers ... have no theory of thought to speak of. I do think this is appalling; how can you seriously hope for a good account of belief if you have no account of belief fixation?’

(Fodor 1987: 147)
